

MINOR INFORMATION:

- If you're curious about the complex relationships between culture, economics, policy and marketing, and the food system, this minor just might be for you! A food systems minor prepares you to lead the way in finding solutions to feed a steadily increasing population while preserving precious natural resources. Experience with food systems is relevant to many different careers, including food sales and marketing, organic food certification, the nonprofit sector, food policy and lobbying, food journalism, food entrepreneurship, and more.

MINOR REQUIREMENTS:

- Complete eighteen (18) units
- Nine (9) units of the eighteen must be upper division (300-499 level)
- NSC 101 or NSC 170C1 is a recommended first course and is a pre-requisite to the nutrition core courses & the nutrition electives

MINOR POLICIES:

- For students who matriculated prior to Spring 2022, per the general education policy, NSC 170C1 may only satisfy one requirement, the Tier I Natural Sciences or Intro to Human Nutrition requirement. If you choose to use NSC 170C1 towards your Tier I Natural Sciences requirement, you will need to take another nutrition elective in its place to reach the required minor units.
- For students who matriculated prior to Spring 2022, a maximum of two Tier Two general education courses may also be used to satisfy the minor requirements.
- For students who matriculated in Spring 2022 or beyond, up to nine (9) units may double count to fulfill requirements in a major, pre-major, minor, and General Education requirement, provided the units are taken in courses that are approved General Education Exploring Perspectives or Building Connections courses.
- The minor electives listed have been approved for the Nutrition & Food Systems minor. No other courses may satisfy the electives requirement, unless approved by your Nutrition & Food Systems minor advisor.

DECLARING THE MINOR:

- Email: nscadvising@arizona.edu to declare the Nutrition & Food Systems minor.

MINOR ADVISING:

- For general questions, please email: nscadvising@arizona.edu.
